DATA PROTECTION

By entering this exhibition, you are explicitly consenting to the personal details you have supplied, including physical addresses, email addresses, being held, processed and used by the exhibition organizers for purposes associated with this exhibition. You also explicitly consent to such information being sent to organizations that have accorded official recognition, patronage or accreditation to this exhibition. You acknowledge, agree and accept that by entering this exhibition, your participation status which includes your first and last name, name of the country used during registration at the exhibition, number of sections entered and number of photos entered in those sections will be made public in a published status list and that the results of your entry shall be made public in exhibition gallery, exhibition catalog. You also agree and accept the policies regarding Breaches of Rules of the FIAP.

SUBJECT MATTER AND SECTION DEFINITIONS

All entries shall conform to the stricter of these definitions for acceptances and awards to be validated by all the International Organizations granting recognition or patronage.

a) Salon Definitions

In **open sections**, entrants can enter photos with any kind of theme: for example: portrait, people, nature, wildlife, landscape, architecture, still-life photography, digital imaging, HDR photos, etc. All acceptance eligibility shall be in accordance with the PID Star Ratings or the Galaxy/Diamond Ratings requirements as appropriate.

Monochrome images may not be entered in the **Open Color** Section. The color and monochrome versions of same image, regardless of title, cannot be entered in different sections of this Salon.

Portrait Definition: The portraits must be only of humans.

Landscape Definition: A landscape photograph is broad and may include rural or urban settings, industrial areas or nature photography. It commonly involves photography of natural features of land, sky and waters, at a distance, though some landscapes may involve subjects in a scenic setting nearby, even close-up. Only color images are allowed in this section.

b) FIAP Definitions

FIAP Nature Definition

Nature photography records all branches of natural history except anthropology and archaeology. This includes all aspects of the physical world, both animate and inanimate, that have not been made or modified by humans. Nature images must convey the truth of the scene that was photographed. A well-informed person should be able to identify the subject of the image and be satisfied that it has been presented honestly and that no unethical practices have been used to control the subject or capture the image. Images that directly or indirectly show any human activity that threatens the life or welfare of a living organism are not allowed.

The most important part of a Nature image is the nature story it tells. High technical standards are expected and the image must look natural. Adding a vignette or blurring the background during processing is not allowed.

Objects created by humans, and evidence of human activity, are allowed in Nature images only when they are a necessary part of the Nature story.

Photographs of human-created hybrid plants, cultivated plants, feral animals, domesticated animals, human-created hybrid animals and mounted or preserved zoological specimens are not allowed.

Images taken with subjects under controlled conditions, such as zoos, are allowed.

Controlling live subjects by chilling, anaesthetic or any other method of restricting natural movement for the purpose of a photograph is not allowed.

No modification that changes the truth of a Nature image is allowed. Images may be cropped but no other technique that removes, adds or moves any part of the image is allowed.

Techniques that remove elements added by the camera, such as dust spots, digital noise and lens flare are allowed.

Complete conversion of colour images to greyscale monochrome is allowed. Partial conversion, toning and infrared captures or conversions are not allowed. Images of the same subject that are combined in-camera or with software by focus stacking or exposure blending are allowed. Multiple images with overlapping fields of view that are taken consecutively and combined in-camera or with software (image stitching) are allowed.

World in Focus Definition

Just as travel and tourism pictures, this section englobes the full range of photographic genres from architecture, culture, events, food, landscape, portraits, etc.

A "WORLD IN FOCUS" image expresses the spirit of an era, the essence of a place or of a culture whether it is shown in an authentic scene or whether it is arranged. Digital manipulation to optimise an image in terms of fine-tuning of levels and colors is allowed as long as the image is looking natural. The same counts for removal of dust or digital noise.

Techniques that add, relocate, replace, or remove any element of the original image, except by cropping, are not permitted.

FIAP BREACHES OF RULES

Penalties: Entries will not be accepted from any entrant who has put on the **FIAP Red List for breaching FIAP regulations**. Entry fees are not refundable in these circumstances.

By the sole act of submitting his/her images or files to a salon under FIAP Patronage, the entrant accepts without exception and with no objection the following terms:

- that the submitted images can be investigated by FIAP to establish if these obey to FIAP regulations and definitions even if the entrant is not a member of FIAP,
- that FIAP will use any means at its disposal for this undertaking,
- that any refusal to cooperate with FIAP or any refusal to submit the original files as captured by the camera, or failure to provide sufficient evidence, will be sanctioned by FIAP,
- that in case of sanctions following the non-compliance with FIAP regulations, the name of the entrant will be released in any form useful to inform the breaches of the rules.

IMPORTANT: Concerning digital entries, FIAP recommends that authors should preserve intact, with no alteration, the original metadata of images. In case of contestation for incompliance with FIAP regulations the fact of not being able to access this important data could mean that the author could be sanctioned.

Each author whose image shows any suspicions about the compliance with FIAP regulations or definitions can be requested by the organizer or by FIAP, to submit the original file (file containing the data recorded by the sensor, if so, the RAW file) plus the file of the image immediately before and immediately following the questionable image. If he/she failed to provide what is required, he can be sanctioned.

Persons who are found guilty of plagiarism are excluded lifelong from FIAP activities.

It is recommended to leave the EXIF data in the submitted files intact in order to ease eventual investigations. If at any time, it is determined in the reasonable discretion of the exhibition organizer or the judges before, during, or after the judging of an exhibition that an entrant has submitted entries where one or more images may fail to comply with these Conditions of Entry, including the stated definitions, the exhibition organizers reserve the right to delete the entry from the exhibition and void any or all acceptances or awards in connection with the exhibition. Fees may be forfeited or refunded in these circumstances. The entrant acknowledges that the decision of the exhibition organizers or the judges is final.

ARTIFICIAL INTELLIGENCE: PICTURES CREATED BY ARTIFICIAL INTELLIGENCE ARE NOT ALLOWED IN THIS SALON! It is reminded that all parts of the image have to be photographed by the author who is holding the copyright of all works submitted. Offenders will be sanctioned for life!
